

PERTEMUAN 5

POSTEST

Nama : ALDI FEBRIANTO NIM : 1900018037	Asisten : Paraf Asisten :	Tanggal : Nilai :
---	------------------------------	----------------------

1. Membuat tabel *user* dengan kriteria berikut

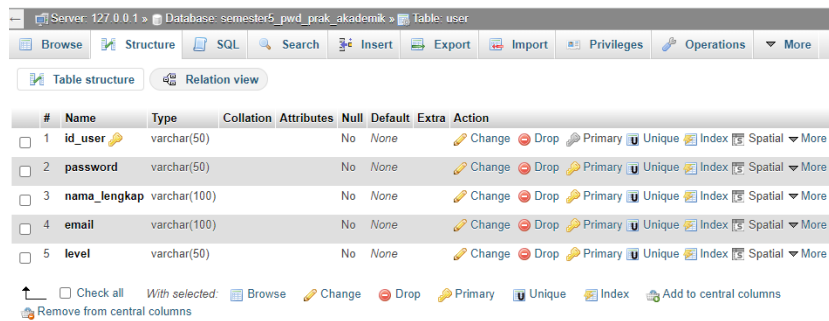

Table structure view for 'user' table in database 'semester5_pwd_prak_akademik'.

#	Name	Type	Collation	Attributes	Null	Default	Extra	Action
1	id_user	varchar(50)			No	None		Change Drop Primary Unique Index Spatial More
2	password	varchar(50)			No	None		Change Drop Primary Unique Index Spatial More
3	nama_lengkap	varchar(100)			No	None		Change Drop Primary Unique Index Spatial More
4	email	varchar(100)			No	None		Change Drop Primary Unique Index Spatial More
5	level	varchar(50)			No	None		Change Drop Primary Unique Index Spatial More

2. Tampilan tabel saya

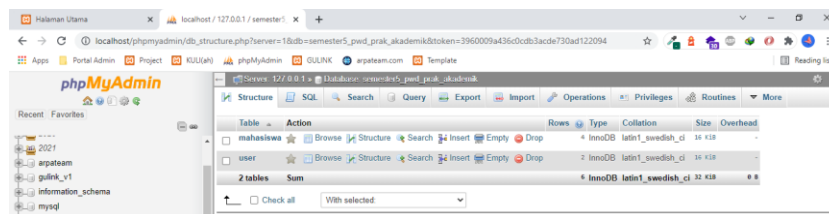

Table structure view for 'user' table in database 'semester5_pwd_prak_akademik'.

#	Name	Type	Collation	Attributes	Null	Default	Extra	Action
1	id_user	varchar(50)			No	None		Change Drop Primary Unique Index Spatial More
2	password	varchar(50)			No	None		Change Drop Primary Unique Index Spatial More
3	nama_lengkap	varchar(100)			No	None		Change Drop Primary Unique Index Spatial More
4	email	varchar(100)			No	None		Change Drop Primary Unique Index Spatial More
5	level	varchar(50)			No	None		Change Drop Primary Unique Index Spatial More

3. Membuat codingan form_user.php

```
1 <?php
2 echo "<h2>Tambah User</h2>"
3
4 <form method="post" action="input_user.php">
5 <table>
6 <tr><td>Username</td><td> : <input name='id_user' type='text'></td></tr>
7 <tr><td>Password</td><td> : <input name='password' type='password'></td></tr>
8 <tr><td>Nama Lengkap</td><td> : <input name='nama' type='text'></td></tr>
9 <tr><td>Email </td><td> : <input name='email' type='text'></td></tr>
10 <tr><td colspan=2><input type='submit' value='SIMPAN'></td></tr>
11 </table>
12 </form>;
```

4. Membuat codingan input_user.php

```

1 <?php
2 include "../koneksi.php";
3 $id_user = $_POST['id_user'];
4 $nama = $_POST['nama'];
5 $email = $_POST['email'];
6 $pass = md5($_POST['password']);
7
8 $sql = "INSERT INTO users(id_user,password, nama, email) VALUES ('$id_user',
9 '$pass', '$nama', '$email')";
10 $query = mysqli_query($con, $sql);
11 mysqli_close($con);
12 header('location:tampil_user.php');

```

5. Membuat codingan tampil_user.php

```

1 <?php
2 echo "<h2>User</h2>";
3 <form method=POST action=form_user.php>
4 <input type=submit value='Tambah User'>
5 </form>
6 <table>
7 <tr><th>No</th><th>Username</th><th>NamaLengkap</th><th>Email</th><th>Aksi</th></tr>
8 ";
9 include "../koneksi.php";
10
11 $sql = "select * from users order by id_user";
12 $tampil = mysqli_query($con,$sql);
13
14 if(mysqli_num_rows($tampil) > 0){
15     $no=1;
16
17     while ($r = mysqli_fetch_array($tampil)){
18         echo "<tr><td>$no</td><td>$r[id_user]</td>
19         <td>$r[nama]</td>
20         <td>$r[email]</td>
21         <td><a href='hapus_user.php?id=$r[id_user]'>Hapus</a></td>
22         </tr>";
23         $no++;
24     }
25     echo "</table>";
26 }else{
27     echo "</table>";
28 }else{
29     echo "0 results";
30 }
31
32 mysqli_close($con);

```

6. Membuat codingan hapus_user.php

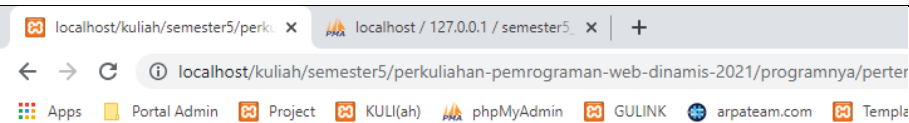

```

1 <?php
2 include "../koneksi.php";
3 $sql = "delete from users where id_user= '$_GET[id]'";
4 mysqli_query($con, $sql);
5 mysqli_close($conn);
6
7 header('location:tampil_user.php');

```

7. Menjalankan input_user.php

8. Saya sudah membuat beberapa data, berikut hasil datanya:

User

[Tambah User](#)

No	Username	NamaLengkap	Email	Aksi
1	aldi	Aldi Febriyanto	aldi@gmail.com	Hapus
2	arpateam	#ARPATEAM	arpateam@gmail.com	Hapus

9. Membuat codingan form_login.php

```

1 <?php
2 echo "<h2>Login</h2>"
3 <form method=post action=cek_login.php>
4 <table>
5 <tr><td>Username</td><td> : <input name='id_user' type='text'></td></tr>
6 <tr><td>Password</td><td> : <input name='paswd' type='text'></td></tr>
7 <tr><td colspan=2><input type='submit' value='LOGIN'></td></tr>
8 </table>
9 </form>;
10 ?>

```

10. Membuat codingan cek_login.php

```

1 <?php
2
3 include "../koneksi.php";
4
5 $id_user = $_POST['id_user'];
6 $pass = md5($_POST['paswd']);
7
8 $sql = "SELECT * FROM users WHERE id_user='$id_user' AND password='$pass'";
9 $login = mysqli_query($con,$sql);
10 $ketemu = mysqli_num_rows($login);
11 $r = mysqli_fetch_array($login);
12
13 if($ketemu > 0){
14     session_start();
15     $_SESSION['iduser'] = $r['id_user'];
16     $_SESSION['passuser'] = $r['password'];
17     echo "USER BERHASIL LOGIN<br>";
18     echo "id user =",$_SESSION['iduser'], "<br>";
19     echo "password=",$_SESSION['passuser'], "<br>";
20     echo "<a href=logout.php><b>LOGOUT</b></a></center>";
21 }
22 else{
23     echo "<center>Login gagal! username & password tidak benar<br>";
24     echo "<a href=form_login.php><b>ULANGILAGI</b></a></center>";
25 }
26
27 mysqli_close($con);
28 ?>

```

11. Membuat codingan logout.php

```
File Edit Selection Find View Goto Tools Project Preferences Help
form_login.php x input_user.php x tampil_user.php x hapus_user.php x form_login.php x cek_login.php x logout.php x
1 <?php
2 session_start();
3 session_destroy();
4 echo "Anda telah sukses keluar sistem <b>LOGOUT</b>";
5 ?>
```

12. Menjalankan file login

localhost/kuliah/semester5/perku... localhost / 127.0.0.1 / semester5

localhost/kuliah/semester5/perkuliah-pemrograman-web-dinamis-2021/programnya/pertemuan-5/form_login.php

Anda telah sukses keluar sistem **LOGOUT**

PENJELASAN SINTAK SESSION

- 1) Pada kasus ini, kita membuat session hanya untuk akses login saja
- 2) Disini session pertama kali di jalankan ketika user berhasil login

```
13     if($ketemu > 0){
14         session_start();
15         $_SESSION['iduser']      = $r['id_user'];
16         $_SESSION['passuser']    = $r['password'];
17         echo "USER BERHASIL LOGIN<br>";
18         echo "id user =",$_SESSION['iduser'], "<br>";
19         echo "password=",$_SESSION['passuser'], "<br>";
20         echo "<a href=logout.php><b>LOGOUT</b></a></center>";
21     }
```

- 3) Session_start() adalah function untuk memulai session, jika tidak ada function ini, maka session akan error
- 4) Untuk membuat variabel session harus di awali
\$_SESSION['nama_session']
- 5) Dan di Dalam session ini, kita menyimpan id_user & password
- 6) Kemudian session ini akan kita akhiri ketika klik tombol logout.php

ct Preferences Help

```
1  <?php
2      session_start();
3      session_destroy();
4      echo "Anda telah sukses keluar sistem <b>LOGOUT</b>";
5  ?>
```

- 7) Session_destroy adalah fungsi utama untuk menghapus session yang ada
